
RECORDED SIGNALS
DERIVED DIAGNOSTICS
Agent interaction
Public state s_0;
emitted actions a_0
Explicit forecast
Model-reported
next state $\hat{s}_1$
Observed
transition
Native execution
returns s_1
Forecast
discrepancy
Compare $\hat{s}_1$ with s_1;
preserve missingness
Held-out test:
does this evidence
add beyond
replay, feasibility
and likelihood?
Public task context: goal,
remaining action budget,
replay and shortest-path queries
Task-relevant
evidence
Progress
discrepancy,
map validity and
false progress
Failure prediction
Development-fitted
probability of later
episode failure
